

You like JavaScript & React/GraphQL/Node in particular? Are you interested in using cutting edge technologies to build and support products with Machine Learning models? Then we have a cool job for you:

JavaScript Fullstack Developer (React/GraphQL/Node)

Who We Are

ambrite is a Swiss, Latvian and South African based company offering software solutions for data mining, predictive analytics and TV Services. Due to its focus on state-of-the-art open source software components and integration of the latest research by the machine learning community, ambrite has become a key partner for both local and global players in Switzerland and Europe in the government, energy and telecommunication industry. For our Zurich- or Riga based branch, we are looking for JavaScript experts that are as passionate about developing data driven, performant applications as we are.

ambrite is currently working on various projects in the field of applied machine learning, delivering end-to-end solutions to our global customers.

What We Are Looking For

- experienced JavaScript developer with attention to details
- track-record in full-stack development, with focus on frontend
- Experience with modern web-technologies like React, GraphQL, TypeScript, Jest, Babel, etc.
- organised, structured, reliable person
- interested to evaluate and learn about new technologies and frameworks within JavaScript and related languages (Reason, Elm) and also Machine Learning/AI
- good German knowledge required

What We Offer

- become a member of a motivated international team in Switzerland, Latvia, South Africa and other locations
- consumer projects with interesting clients in Europe and North America
- conference visits, courses for further education and extensive library

If you are interested in joining ambrite, please do not hesitate to mail your application documents to our HR director Daniela via jobs@ambrite.ch. We are looking forward to hearing from you.
